

# 2talk 1300 Inbound

## Critical Information Summary

## Information About the Service

### Service Description

This Service is a cloud-based service which allows inbound calls to 1300 numbers hosted on the 2talk Cloud Voice platform to be delivered to any PSTN, Mobile or a SIP endpoint such as an IP phone, IP PBX or Softphone. Numbers can either be licensed from 2talk or may be ported from another service provider.

### Minimum Contract Term

This plan is available on a month-to-month basis and there is no contracted term beyond one month. If you cancel your service before the end of a billing period 2talk will not credit you for any unused days remaining in your current billing period. There are no early termination fees.

### Cloud PBX Features and Availability

This plan includes access to all the Cloud Voice features to enable you to use this service. Cloud Voice features are available to all customers. Features are only limited where a customer has purchased "DID Numbers".

### Service Availability

Most 1300 and 1800 inbound numbers cannot be dialled from outside of Australia.

1300 and 1800 inbound numbers cannot be used as outbound caller ID within Australia.

Any phone calls received on your 1800 or 1300 number will be charged at the applicable call rate. Inbound 1800 and 1300 minutes are included in 2talk AU and Country Bundles.

### Payments

Payments for this service are made via credit card. Alternative arrangements to pay via direct credit into our bank are available on request. Customers will be provided with access to an online customer portal, which will allow the customer to view and manage account billing and payments including statements, payment receipts and history, service subscriptions, and usage reporting.

### Pre-paid Service

Services are supplied on a prepaid basis. This includes calling, plan add-ons and number porting. Sufficient credit must be maintained on the customer account at all times to ensure there is no disruption to service.

2talk reserves the right to suspend accounts that are overdue by more than 30 days. Should the account remain overdue for more than 60-days, the service will be cancelled and all inbound numbers (DID's) will be released. Numbers, once released, cannot be re-connected.

### Billing and Usage Information

Your account is charged fixed monthly fees on the same day each month. This date is called your Bill Date and is the date your account was created, (e.g. 10 July, 21 September).

You will be issued with a Statement at the end of each Bill Period that summarizes the service use along with any payments made into the account during the billing period. To access full usage information log in to your customer account via the online

web portal. Your first monthly statement may include partial month charges from when the service was activated until the next billing date.

## Plan Usage Information (AUD including GST)

Number Price Per Month	\$10
New Number Setup	\$50
Minimum Total Cost excluding Calling	\$60
Numbers Included	1 x 1300 Number
Channels Included	2
Inbound	10c per minute
<b>Outbound/Forwarding</b>
